## FILTER-MATE® FILTER TREATMENT & WATER CONDITIONING.

**FILTER-MATE POTASSIUM PERMANGANATE.** A strong oxidizing agent. It converts dissolved iron and manganese to insoluble oxides which are removed through filtration. Potassium Permanganate regenerates and oxidizes greensand iron filter media.

**FILTER-MATE SOFTENER CLEANER.** Removes iron, oil, dirt, silt, debris and tannins from fouled water softeners while increasing the capacity and efficiency. Used as a preventative maintenance for all softeners. Softener Cleaner contains Citric Acid and is safe and environmentally friendly.

**FILTER-MATE LIQUID SOFTENER CLEANER.** Will chemically clean a fouled resin bed of a water softener and restore the exchange capacity of the resin. Most types of water softening resins can become fouled with iron and other contaminant's that will affect the performance of the ion exchange system.

**FILTER-MATE CHLORINE PELLETS.** Chlorine temporarily disinfects and destroys disease-causing organisms found in wells, cisterns, storage tanks, and waterlines. Can also be used in dry pellet chlorinators.

**FILTER-MATE SANIWELL.** Using SaniWell twice a year will help keep wells free from iron and bacteria build-up, improving the smell and taste of the water. A well should be sanitized if it has been contaminated or disturbed as a result of repairs. SaniWell pellets and granules are designed to help purify and eliminate harmful bacteria in storage tanks, well casings, fixtures and pipes.

**FILTER-MATE TEST KIT.** Test your home water quality quickly & accurately! Simple 8 home water tests to detect the presence of: hardness, nitrates, chlorine, nitrites, pH, iron, alkalinity and copper.
